

1500 BAR TAHLİYELİ TABANCA

PRODUCT DESCRIPTION

Yuefan self-rotating surface cleaning tool is a surface cleaner with magnetic braking system installed on the spray gun. This lightweight cleaning head can be connected to any type of high pressure cleaners and is easy to maintain. Working pressure of cleaning tool rated up to 22K or 44k psi(1500bar or 3000bar), applies in industrial equipments surface preparation, ship hull rust and

paint removal. Magnetic braking system controls rotational speed for minimal wear and maximum cleaning. TECNICAL DATA AND OPTIONS

Max Operating Pressure:	1500 bar (22K PSI)
Length:	120mm
Inlet Connecting Screw:	9/16" HP Male
AssemblyWeight:	4.1kgs

PRODUCT DESCRIPTION

YF-20K PSI Waterblast Hand Control Dump Gun is designed for high-pressure cleaning applications, delivering powerful performance with precision control. Key features include:

- High-Pressure Capability: Rated for up to 20,000 PSI, ensuring effective and efficient cleaning.
- Ergonomic Design: Comfortable hand control for easy operation and reduced user fatigue.
- Quick Release: The dump gun design allows for quick release of water pressure, enhancing

safety and convenience.

- Durable Barrel: Features a robust 9/16" barrel to withstand high-pressure use and provide long-lasting durability.

Ideal for industrial and commercial cleaning tasks, this waterblast gun is a reliable tool for achieving thorough and efficient results.
