

2800 BAR TAHLİYELİ AYAK PEDALI

PRODUCT DESCRIPTION

YF Foot Operated Control Valve is ideal for a variety of waterblast tube cleaning applications, it allows the operator to have complete control of the pressure at all times.

- The custom-designed safety cage, coupled with a robust blast wall, provides unparalleled protection for operators, surpassing all foot control guns available in the industry.

- Integrated "wings" shield the high-pressure end fittings from potential external harm.

- The product is finished with an orange powder coating.

APPLICATIONS

Chemical Industry

High pressure water jet cleaning technology used in chemical factory production lines, pipelines, tube bundles, gas pipelines, heat exchangers. Clean

Marine Industry

High Pressure cleaning machines are widely used in the shipbuilding industry. They can select high-pressure cleaning machines with appropriate pressure and flow rate

Oil and Gas Industry

In the production process of the petrochemical industry, due to various reasons, various types of towers, heat exchangers, tank containers, reaction vessels, and pipelines will

Food Industry

Automation is a high-tech company specializing in the R&D, production and sales of intelligent automatic control, digital and networked controllers and sensors. Its
